What is InfoSec?

Information Security (InfoSec) is the process and methodology implemented to preserve the Confidentiality, Integrity & Availability of data and information. The exponential growth of the Internet, e-commerce and social-media has presented organizations with formidable challenges in keeping their information secure while doing business on the Internet.

The challenges are quite daunting and the tasks are arduous. From cyber criminals, industrial espionage, malware to Advanced Persistent Threats; the resources are limited to combat these multiple threats.

CYBER ATTACK!

Our customer centric security services are optimized to deliver forward thinking security posture to ensure business functionalities are maintained and mission critical assets are protected.

In a connected world, organizations are vulnerable to a myriad of cyber threats. Let **SNATEK** assist in managing these threats through defense-in-depth security solutions and services.

Give us a call and see how we can assist!

"One Step ahead of your IT Wants and Needs"

SNATEK

We are an Information Security company based in South Florida, providing a broad range of comprehensive security services to help our customers function and manage the risks of doing business on the Internet amidst the growing threats of cyber attacks. Our team of security professionals is well seasoned in designing solutions for multi-national organizations, service providers and governments. We help organization maintain the balance between security and functionality by providing the visibility necessary to protect critical assets, comply with regulations and to align security with overall strategic business objectives.

Security Services

Information Security Services:
Enable our customers to implement & design a series of security best practices to manage the Information Security Lifecycle.

- Policies & Procedures
- Threat / Vulnerability
- Assessment & Audits
- Penetration testing
- Security Awareness
- Network Security Design
- Firewall & IDS/ IPS optimization
- Malware and APT
- Advanced Threat Protection

Managed Security Services/ SaaS:
Many organization have limited resources to maintain and manage security internally. SNATEK 's solution is MSSP. With MMSP, we manage your security through a cloud based security plaform to help reduce overhead while maintaning a firm security posture and maturity.

For those customer who wish to be a provider, we have a turnkey cloud based mutli-tenant CPE or Security as a Services.

Critical Infrastructure Protection:
SNATEK recognizes not only people and information need protection, but Critical Infrastructure such as Sea & Airports, which plays a key role in a countrie's GNP. We help identify, reduce, and mitigate risks that would adversely impact commerce, tourism and reputation though our effective security surveilance and access control solutions.

Business Continuity & Contingency Planning:
The triad of security is CIA. While our Information Security Services address the C & I, BCCP addresses the (A) Availability portion to complete the triad. Our BCCP services are proactive services helping our customers plan/ respond to disasters, identify weakneses & risks to lessen the impact and ensure resources are available during a crisis.

- Business Impact Analysis
- DR Plans and Procedures
- Assessment & Audits
- Awareness Training
- Threat Identification
